

# *Flower Calendar from "A flowering calendar of Rhipsalideae and other small flowered epiphytic cacti"*

## **Flower Calendar**

The lighter area indicates the pre- and post-bloom phase; the darker area indicates the main flowering phase.

Genus	Species	JAN	FEB	MAR	APR	MAY	JUN	JUL	AUG	SEP	OCT	NOV	DEC

	<i>microsphaerica</i>					■	■						
	<i>opuntioides</i>	■	■	■	■								

**ACKNOWLEDGEMENTS:** This chart is taken from “Ein Blühkalender der Rhipsalideen” by Gisela Tismer, Werner Höller, and Wilhelm Barthlott. The article was published in *Kakteen und andere Sukkulanten* (KuaS), the monthly journal of the Deutsche Kakteen-Gesellschaft e. V. [DKG; German Cactus Society], and can be found in v. 50, n. 10 (October 1999), pp. 241-48. Many thanks to the DKG, the authors and the editor of KuaS, Detlev Metzing, who gave permission to reprint the article; and to Prof. Dr. Wilhelm Barthlott and Dr. Nadja Korotkova for their assistance in bringing the article up to date with the current nomenclature. The English translation by Linda Sinkovic of the entire article (“A flowering calendar of the Rhipsalideae and other small flowered epiphytic cacti”) appeared in the *Epi News* v. 44, n. 11 (November 2019), published by the San Diego Epiphyllum Society.
